DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, 4-10, 16-19, 21-27, 30-33, drawn to an announcer for a publish-subscribe architecture.

Group II, claim(s) 3, 11-15, 20, 28-29, drawn to an allocator for a sequence identifier.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group I relates to a method and system for announcements whereas group II relates to a method and system for allocating a sequence identifier.

As noted in the specification, "the allocator 20 and announcer 12 are completely decoupled" (page 9, line 3). Furthermore, although the inventions of group I may possibly communicate with the inventions of group II, there is no requirement, explicit or implicit, that the "plurality of sequence identifiers" mentioned in claim 1 be generated by

the method of claim 3; in fact, while the method of claim 1 utilizes identifiers of at least two subparts, the identifiers generated by the method of claim 3 consist of exactly two subparts. The general concept of sequence identifiers, even those of multiple parts, is not inventive, as examples of previous such systems are named (GAP, TIBnet, Smart Sockets) in the background section of the specifications (page 1, lines 10-26), and thus does not serve as a single general inventive concept to link the two inventions.
